

How to Build a Circle of Fifths Easily

Circle of Fifths credit: Just plain Bill in Wikimedia, the rest is public domain

Starting on G, count one letter backwards on each letter, that is the first Sharp, do the same on each letter and add them, G has F Sharp, D has two flats, F and C, A has 3 flats, F C and G, E has 4 sharps, F, C, G and D

Starting on **C** (because it has 0 sharps, count 5 letter in the ABC C,DEFG and you arrive to **G**, then count another 5 letters and you will end up in **D** (GABCD) then another 5 letters (DEFGA) and you will arrive to **A** then count another 5 letters starting in **A** (ABCDE) and you will arrive to **E**, then count another 5 letters (EFGAB) and you will arrive to **B**, then count another 5 letter (BCDEF) and you will arrive to **F**, you need to sharpen that one, then count another 5 letter and you will arrive to **C**, you must sharpen that one, because you already have a C and all letter are already sharpened in musical alphabet

Also, you can write down the Phrase

0 1 2 3 4 5 6 7 1flat

Cool Guys Donate Always, Encourage Boys to Find Coolness Fb and write down a number on top of each upper case letter, starting on 0 and you will get the number of sharps in each scale, as shown, sharpen the last two and notice that F has one flat.

0 1 2 3 4 5 6 7

Always Encourage Beams to Find and Count Generous Disco Adventures

Is used for Minor keys with sharps. the word **Beams** (Bm) indicate that all scales are sharp (B#minor, F#minor, C#minor after this letter).
